#### MEASUREMENTS

- With standard dies. Crimping range can be increased with special dies.
- Theoretical with 10 mm cycle.

**P16HP** - PORTABLE

**P16HPZ** - FLEXIBLE

**P16AP** - COMPACT

**P16APZ** - FLEXIBLE

Manually operated hydraulic crimping machine for repair workshops. Easy to use, lightweight and compact in size.

Machine is connected to pump with a flexible hydraulic hose that enables crimping in tight and difficult spaces.

Suitable for workshops where compressed air is available. This lightweight machine can easily be carried by hand in need of relocation.

Machine is connected to pump with a flexible hydraulic hose that enables crimping in tight and difficult spaces.
