# FP145

Big brother of the famous FP120 with more force, bigger opening and larger dies. The 140-series die system with adaptor dies makes an excellent choice for large, medium and even small size fittings.

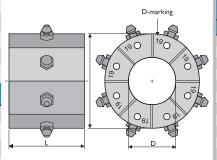

FP145 is an ideal machine for 2" 6-wire hoses and also for medium range industrial hoses. FP145 is available with separate hydraulic unit or as a compact model. With separate hydraulic unit, access to the back side of the machine is free, when part feeding from the back is needed.

Side die rack as an option, 5 slots (Compact only)

 With standard dies. Crimping range can be increased with special dies.
Theoretical with 10 mm cycle.

 Theoretical with 10 mm cycle.
Maximum opening is the total die travel. Add this value to the minimum crimping diameter of the die set used. The result is the maximum opening of the machine with die set in place.

Power supply cable not included.
